

UnivIS - Lehrveranstaltungsplan

The treemap visualization displays a hierarchical structure with multiple levels of detail. The top level is divided into several main categories, each represented by a large rectangular block. These blocks are further subdivided into smaller blocks, creating a nested hierarchy. The colors used are primarily shades of gray, with some white and light gray blocks. The blocks are arranged in a grid-like pattern, with some blocks containing text labels. The overall layout is dense and complex, representing a large dataset or a detailed organizational chart.
