

UnivIS - Raumplan Online-Meeting

Aktuelle Informationen
zur Raumbelegung und
Anwesenheitserfassung
während der Pandemie:

The diagram is a complex, multi-layered hierarchical structure, resembling a large tree or a complex network. It is composed of numerous small, rectangular nodes arranged in a grid-like pattern, with lines connecting them to form a dense web of relationships. The nodes are organized into several distinct sections, each with its own set of labels and connections. The overall structure suggests a highly organized and interconnected system, possibly representing a large-scale organizational chart or a complex data network.

The diagram is divided into several main sections, each with its own set of labels and connections. The labels are organized into a grid-like pattern, with each label corresponding to a specific node or group of nodes. The connections between the nodes are represented by lines, which form a dense web of relationships. The overall structure is highly organized and interconnected, suggesting a complex system with many different components and relationships.
