

UnivIS - Raumplan Online-Meeting

Aktuelle Informationen
zur Raumbelegung und
Anwesenheitserfassung
während der Pandemie:

The diagram is a complex, multi-layered hierarchical structure, resembling a tree or a flowchart. It is composed of numerous small, rectangular blocks, each containing text, arranged in a grid-like fashion. The blocks are interconnected by lines, forming a dense network of relationships. The overall layout is organized into several vertical columns, with the leftmost column being the widest and the rightmost being the narrowest. The diagram is rendered in a grayscale style, with black lines and text on a light gray background.

The structure is highly organized, with a clear top-down hierarchy. The top level consists of a few large, central blocks, which then branch out into many smaller blocks in the subsequent levels. The text within the blocks is small and dense, suggesting a high level of detail and complexity. The connections between the blocks are represented by thin lines, which are most prominent in the upper levels of the hierarchy and become more sparse as the structure branches out.
